Welcome,
Welcome to North Central Missouri & to the Missouri Red Angus Associations Inaugural Show-Me Red Fall Sale! Over the past summer, the MORAA board of directors elected to sponsor a fall sale in the Northern part of the state. We felt sponsoring this event would provide MORAA members with additional marketing opportunities and allow our members to expand their footprint throughout the state in an effort to meet the growing demand for quality Red Angus genetics.

Red Angus continues to lead the industry as cattlemen demand quality genetics with strong maternal traits. That is why the Red Angus/Red Angus influenced females continue to be the most sought-after female in the beef industry today. You ask why? It’s all about the cow & the “ility”
- Motherability
- Fertility
- Docility
- Stayability

The MORAA recently rolled out a program to identify fescue based Red Angus animals when they announced their Fescue Belt Certification Program. We did so in an effort to identify animals that were born, bred & raised on Missouri fescue. Missourian's have built their herds using genetics that have proven to be “fescue tolerant” livestock. In 2020, the Board of Directors elected to expanded the program to include animals from the entire fescue belt region of the United States. As you browse the catalog, you’ll find these animals identified as such.

We are confident that our members are offering you some of the top Red Angus genetics available today. Whether you are looking for a fancy little show heifer, females to start or expand your registered herd or a top set of commercial females, make plans to attend this great event. The cattle will be in place & available for viewing early Friday afternoon. Whether you intend to bid, buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, don’t hesitate to contact any of the owners or buyer representatives listed in this catalog. Additionally, the sale will be broadcast live over the internet through DV Auction.

Regards,
Dan Lacy
MORAA President

Purchaser’s Risk
All animals are the owner’s risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

Bidding
Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

Certificate of Registry
A certificate of registry for cattle will be transferred to buyer.

Announcements
Any errors or changes in information contained in the catalog will be announced from the block and such announcements shall take precedence over the information contained herein.

Health
All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold.

Breeding Guarantee
All animals are guaranteed by the seller as outlined in the Red Angus Association of America code of ethical sale practices.

Liabilities
All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility or sale manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or act of god. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller. They are not responsible in any way for the failure on the part of the buyer and the seller to live up to their obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action must be between the buyer and the seller. This catalog has been prepared by the sale manager from pedigrees and information supplied by sources deemed reliable, however, the sale manager will in no way guarantee the pedigree, percentages of the animals selling, or data included in this catalog. Any exceptions taken are between the buyer and the seller.

Contract
The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

Special Thanks to
RITCHEY TAGS FOR THEIR SUPPORT
BELOW YOU WILL FIND DESCRIPTIONS OF THE EPD DATA LISTED IN THIS SALE CATALOG.

**Expected Progeny Difference (EPD),** is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I," and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC),** is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

**INDEX MEASUREMENTS**

**HerdBuilder (HB),** Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions. This Index focuses on Stayability, Heifer Pregnancy and Calving Ease but also factors in carcass based traits and growth indicators.

**GridMaster (GM),** Use the GridMaster Index if your primary goal is maximizing profitability of feeders in the feedyard and on the rail. Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

**GROWTH**

**Calving Ease Direct (CED),** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW),** expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW),** expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW),** expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

**CARCASS**

**Carcass Weight EPD (CW),** expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

**Marbling EPD (Marb),** expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

**Ribeye Area EPD (RE),** expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

**Yield Grade (YG)** predicts differences in USDA Yield Grade score and is expressed in USDA Yield Grade units.

**MATERNAL**

**Maternal Milk EPD (Milk),** is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

**Calving Ease Maternal (CEM),** is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

**Red Angus’ Stayability (STAY) EPD** is a selection tool to improve overall cowherd efficiency through reducing replacement rate. Cows that stay productive, are problem free and last longer mean a larger percentage of heifers can be cash cropped, instead of developed as replacements. STAY predicts the probability of a bull’s daughters remaining productive until at least six years of age.

**Heifer Pregnancy (HPG) predicts the probability of heifers conceiving to calve at two years of age.**

**Maintenance Energy (ME) predicts differences in daughters’ maintenance energy requirements and is expressed in Mcal/Month.**

Missouri Red Angus Association
Fescue Belt Certified Program Announced

The Missouri Red Angus Associations Board of Directors recently approved the "Missouri Red Angus Association Fescue Belt Certified" program as an initiative designed to promote Missouri Red Angus members genetics.

Many of us who live in the “fescue belt” have experienced the problems associated with importing newly purchased cattle into our environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue struggle to perform after being imported onto this “grass we love to hate”. Some animals eventually overcome this issue, but many will not and will eventually be culled from the herd.

Fescue toxicity results from toxins called ergot alkaloids, which are produced by a fungus called endophyte that grows within the fescue plant. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth rates, reduced reproductive performance, and in some cases lost tail switches or even hooves. The decreased animal performance seen during the “summer slump” of cool-season pastures is made even worse by these toxic effects of fescue.

Research on the subject of fescue management has been done for years. Several strategies can be used to mitigate the toxic effects of fescue, including removal or suppression of seedheads, overseeding of pastures with legumes or other forages, and good mineral supplementation programs. However, fescue remains a serious challenge. The USDA estimates fescue toxicosis costs the U.S. beef industry an estimated $600 million to $1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

Missouri beef producers recognize the value of selecting cattle that are adapted to fescue. In 2016, University of Missouri Extension Geneticist, Dr. Jared Decker, was awarded a $3 million grant from the USDA to evaluate genetic differences in cattle among regions. Decker and his colleagues are utilizing DNA markers to study the interactions between cattle DNA and the environment. The study is focused on DNA, hair shedding, and tall fescue forage. When complete, the data will be used to design region-specific EPDs.

The entire state of Missouri is situated within the fescue belt. Since fescue was introduced into our region, Missourians have built their herds retaining only genetics that have proven to be “fescue tolerant.” When looking for Red Angus genetics, look for the MORAA FBC logo & cattle that have “Bred-in Fescue Tolerance.”
This heifer has been halter broke and is coming along nicely. Very gentle personality. Danica has a way with breaking calves to be gentle. Her mom was a show heifer and she is following in her footsteps with her disposition. She is a Regency (RAAA#3791383) daughter out of a great Lacy/Heritage cow. She will make a great cow for your herd or show heifer if you want to take her that direction. She has lots of size to her. Doesn’t seem to be bothered by much of anything.

This beautiful colored Charolais composite/percentage Red Angus will add just a little color to your herd. She can be double registered. She is out of a Charolais first calf heifer Cruter Big Creek Reba 803 (AICA #F1252361) and a Regency daughter (RAA#3791383). She will be a big and powerful female. Danica has halter broke this girl and she is coming along nicely. She is ready to find a great home either in the pasture or show road. This heifer has a bright future ahead of her.

MORA 6137G is an attractive, stylish open heifer. This heifer is loaded with proven genetics on the sire and dam side, including Basin EXT 45T5 and Red Six Mile Sakic. 6137G’s grand dam boasts a 105 MPPA. consistently producing offspring above average. Her dam is a long bodied, deep ribbed, square hipped, gorgeous female whom visitors take note of. If you are looking for a moderate, easy keeping, maternal female to add to your fall program, MORA 6137G is one to consider.

Susan and I purchased the dam of Ariel 10H from Danica Lowrey in the 2019 Spring Sale. She didn’t disappoint us as she raised a beautiful motley faced heifer out of our go to heifer bull, Copperhead 7172x. We have numerous Copperhead sired cows in our herd, and they possess tremendous udders and feet, a warm disposition, and produce healthy, highly marketable offspring. We believe she will be a very profitable, fertile female and raise excellent calves. Other genetics in her pedigree include Lacy Gold Bar 1120, Lacy Lakota 135 445, Mission Statement P27 and Red Soo Line Contender. 98.4% AR and 1.6% HP.

The Fall Opens

The Fall Opens

THE SHOW-ME REDS FALL SALE  12  NOVEMBER 14, 2020 - KIRKSVILLE, MO
Deep, broody, and impeccable leg and foot structure. This heifer is hard to sell, but sometimes the good ones have to go. Check out her EPDs. This heifer will flat out perform and I expect her calves to push down the scales at weaning. Her dam, TRCC Marie 36B is also in my sale offering. Easy to handle. Conceived, born and raised on fescue.

If there had been an open show at the Missouri State Fair this year, you would have seen this beautiful heifer there! A sweetheart of a heifer with a dark red color. I ask myself why I'm selling her, but I wanted to put a really good heifer in this first fall sale. Don't let the fact I didn't get a good picture of her cause you to overlook this one. We have been very happy with the calves from Red Blair's Signature 6D (#3920481), and this heifer is no exception! Sells open.

A very eye-appealing heifer from our Enchantress dam has done a very fine job of producing wonderful calves for us (her bull calf was named reserve calf champion at the 2017 Missouri State Fair). Sired by RED BLAIR'S SIGNATURE 6D. This dark red heifer is destined to become a very productive cow for her new owner! Sells open.
A well rounded moderate heifer with good confirmation. She has good BW scores to boot!

If you are looking for a functionally correct heifer that is backed by a maternal family yet has the growth and power to have those fast growing calves, this is your heifer. Her growth EPDs are in the top 30% and yet she still has the maternal EPDs to make a great cow. She will be open and ready to breed to the bull of your choice.

If you are looking for a functionally correct heifer that is backed by a maternal family yet has the growth and power to have those fast growing calves, this is your heifer. foundation female with top calving ease numbers—come check her out on sale
day!
This should be a mating packed with power. 902G is a really nice bred heifer by TW Hard Line, an outstanding herd bull for us. His daughters are full of growth and good carcass, and out of one of Twin Willows top cows the 18Z cow.

Safe to AI 5/01/20 to Bieber Atomic C219 Reg. 3474996.

LOT 26 - DAL PRAISE ROYAL 003G
Dal Praise Royal 003G would be an excellent addition to your farm. This girl was Danica's first bred and owned heifer, completely broke and trained all by herself. This heifer was ai’d on 5-19-20 to Sooline Power Eye 161x (reg #1406779) as a calf she won her class at NAJRAE in 2019. She also won her division at OEF and MSF. She didn’t travel much in 2020 with everything being canceled but was Reserve Supreme Heifer at Cedar County Fair. She has lived her show life and is ready to make a great cow. With her genetics (Cruel Girl granddaughter and a Regency daughter) and the genetics Power Eye brings she is ready to have a top of the line calf you do not want to miss out on. This heifer was ai’d on 5-19-20 to Sooline Power Eye 161x (reg #1406779).

LOT 27 - BACH MS CHINOOK 9020G
Wow! Here’s a JEFFRIES MS CHINOOK Y929 granddaughter that is simply one of the best yearling heifers we’ve ever produced. She is a big, broody female who has depth in her chest floor, level throughout, and square from hooks to pins giving you that show quality appearance. She is structurally correct from the ground up and visually attractive. Check out her off-the-chart performance parameters. 72% of her EPDs are in the Top 27% of the breed, including a Top 5% Herdbuilder Index and a Top 1% Gridmaster Index. She scans an enormous 7% Adjusted IMF with a ratio of 127 along with an 11 in. ribeye area (115-ratio). Calving ease combined with growth—top 5% WW, 2% YW, and 1% ADG EPD. This heifer is going to have an IMPACT on your herd! We are selling 50% genetic interest rights & 50/50 on flushes and natural progeny she produces. We plan to maintain possession at Bachman Cattle Farms. Confirmed AI bred to 9 Mile One-of-a Kind 6129, with the calf due on March 15, 2021.

MARTIN’S EVALU 071G is a 1A heifer and daughter from the legendary C-BAR EVOLUTION 107Y. She hails from genetic lines of Pelton, C-BAR, Diamonte, and Mushrush. Her dam was Champion Red Angus Heifer at the Arizona National Livestock Show in 2015. She is bred to TW GQ MAN 767E (3906519), who is the son of two time Denver National Stock Show Champion Red Angus bull Six Mile Taurus 519A and Keifers Lulu Y55. This calf, due late December or early January, will have champion genetics on every side. Eval is halter broke and will make a great addition to any herd.

MARTIN’S RHONDA 07XH (4094538) is a very well-bred 1A heifer with genetic lines from Beckton, HXC, Mushrush and Pelton. Her dam was Champion Red Angus Heifer at the Arizona National Livestock Show in 2015. She is bred to TW GQ MAN 767E (3906519), who is the son of two time Denver National Stock Show Champion Red Angus bull Six Mile Taurus 519A and Keifers Lulu Y55. This calf, due late December or early January, will have champion genetics on every side. Eval is halter broke and will make a great addition to any herd. Bred to TW GQ MAN 767E (3906519).

If it wasn’t for bull trouble last fall along with no spring herd, these heifers would most likely be staying in my herd. Heifers are AI sired by Semex sires and bred to a dark red Semex sired bull. This heifer has plenty of growth (top 25%) and maintenance in top 1%. Confirmed bred natural service to LUCKY M TRANSITION 928 (4144992) due March 6th for 60 days.

Wow, a daughter of the notorious BRYLOR CHEROK 22L cow. Don’t let this opportunity slip by. It’s not often you can change your cow herd and this is one of them. PE safe to Red Six Mile Car Load 275D, 12/15/19–2/15/20; Reg #3786673.
Another young cow from the Bloxy cow family whose only fault is being bred for spring calving as we move to all fall-calving. Check out her fantastic BW to YW spread, as well as her ME EPD of -9! And, she weaned at 701#! We currently have her yearling bull calf in our bull pen.

She is bred to Red Blair's Signature 6D (#3920481). Exposed May 1 - September 15.

A tremendous young female from one of Twin Willows top donors—the 59Y cow. The Nexus daughters are hard to find and out of the 59Y cow is one we debated to part with but we wanted to bring some good ones.

I may have lost my mind selling this cow. She is deep, super correct, sired by Profitbulder, has phenomenal EPD's and is just 3 year old! Her dam never misses and is a matron of the herd.

Another young cow from the Bloxy cow family whose only fault is being bred for spring calving as we move to all fall-calving. Check out her fantastic BW to YW spread, as well as her ME EPD of -9! And, she weaned at 701#! We currently have her yearling bull calf in our bull pen. She is bred to Red Blair's Signature 60 (#3920481). Exposed May 1 - September 15.
We purchased this extremely easy-fleshing daughter of RED LAZY MC CC DETOUR 2W (1352939) in the 2014 Wildcat Creek Ranch sale as a bred heifer. She has always been a favorite, and is only being offered for sale as we have dedicated our program to an all fall-calving herd. She has a daughter that is in the Jones Red Angus herd in CO.

She is bred to Red Blair’s Signature 6D (#3920481) with exposure dates of May 1 - September 15. Was called 70 days bred on August 19.

Here's a chance at a great Fritz Justice 8013 (1255322) Daughter. The vet called her due late November but there's a chance she could have a calf at side by sale time. The calf's sire is our jointly owned PIE One of a Kind 842 (4047190). We are weaning his first calf crop now and they are impressive. I'm betting DY1439's calf will impress you from the day its born all the way to weaning. Due to calve late November.

Calf due date is November 25 but could come early!

BD: 2/23/15
BRED COW
Reg: 3528541 Cat: A

We are offering a select few of our fall calving cows that are just a little late for our calving season goal. RGRS Sunflower is a moderate framed deep bodied Fritz Justice 8013 (1255322) daughter that goes back to the famed Nebula P707 on her dam's side. She has a very exceptional set of EPD's and what is most exciting about this offering is she is pasture exposed to JSWO Stockman F101 #4075788 (semen selling in this sale) this calf will have calving ease and growth with great carcass data as well. Calf due date is November 25 but could come early!
This nice-bodied moderate young cow will calve in late October at the tail-end of our fall program. Her Milk EPD of 30 and -2.4 BW are something to consider. Her calf by Red Blair’s Signature 6D (#3920481) is sure to be headed for the keeping pen. She is the dam of the terrific open heifer featured as Lot 9 in the sale.

A young Lacy bred cow from our fall calving herd. She has a bull calf at her side out of our favorite Lacy sire Cornerstone 069C. Our registered cows run with our commercial cows so they are proven to be productive on just fescue grass and hay.

A nice young cow that is Lacy bred. This cow has a heifer calf at her side out of Lacy Cornerstone 069C. This will be a nice pair to help build a registered program that can thrive in fescue country.

Offering a young cow who's dam is a direct daughter of Mulberry 26P, top 26% GridMaster, and a solid bull calf born 10-08-2020, ROOF Red Theo H306 (RAAA: 4318339) sired by ECCR Red Theodore 1815C (RAAA: 3527550) Don't miss this nice Cow/Calf pair!
KFF ERA 9066 is sired by Mushrush ERA B047 and is a well balanced bull with a nice phenotype and strong numbers to back it up.

KFF ERA 9066 is sired by Mushrush ERA B047 and is a well balanced bull with a nice phenotype and strong numbers to back it up.

KFF Impact 9057 is a bull that you definitely want to see on sale day, he has plenty power when you get behind him with great center body shape and is very impressive on paper as well.
This bull has been a standout from day 1. He is long, deep bodied and has great leg and foot structure. He was just 67 pounds at birth and yet really pushed down the scales for a 1500 pound yearling weight. To get ready for breeding season he has been on a high roughage and low grain ration. Turn this easy to handle bull out and sleep during calving season! Conceived, born and raised on fescue!"
RAISED ON FESCUE - 29

Look hard at this yearling GMRA Tesla 6214 (#3538390) son. With Calving Ease, Wean Weight and Yearling Weight all in the top 15% of the breed this bull has it all. Look for his calves to come easy and grow like weeds!!! His dam out of the great RCC Bravo B69 (#1688053) has a great udder good feet and disposition to burn. She will stay in our herd for years to come.

THE SHOW-ME REDS FALL SALE
NOVEMBER 14, 2020 - KIRKSVILLE, MO

Sired by the popular Genex sire Domain, 9016 is smooth fronted, level topped, and deep ribbed. This masculine, big footed bull is wide based and expressively muscled. He is outstanding in phenotype and genotype. His EPDs rank him in the top 20% of the breed for CED, YW, Milk, ADG, Marb and REA. His Bieber Hard Drive Y120 sired dam won both her January heifer calf class at the 2015 National Red Angus Junior show at Louisville and the Land of Lincoln class at the 2016 NAJRAE. We used him as the cleanup bull for our yearling heifers this past summer. He will be semen and trich tested prior to the sale.

Lot 66 - Bach Mr Crackerjack F111E ET

This bull represents Bachman Cattle Farms breeding at its finest. He's extremely eye-appealing with structural correctness in abundance. Moderately framed, yet he travels so smooth and glides his way around the pasture. He's been our "go-to" heifer bull, but with growth, maternal and carcass traits galore. He's qualified as a heifer bull with his progeny hitting the ground with an actual 67 lb. birthweight average, yet supports Top 19 - 21% Growth EPDs. Stack all that on top of his Top 6% Herdbuilder Index, meaning you'll want to keep females to build your herd around. With a Gridmaster Index in the Top 23% range, you can see why he qualifies as a Top $ Angus bull as well. CRACKERJACK = COMPLETE! Selling 50% Genetic Interest rights plus split pasture walking rights - 1st pasture rights available for spring of 2021, then negotiated after that. Check out this bull's Dam in this sale - RAB 184B.

Open fall born (September 6-16) heifers out of commercial Red Angus cows that were time AI’d to Lacy 1776 002D (SL Independence x Lacy Legacy 6097). We have been exclusively using Red Angus sires both naturally and with AI for the last 12 years. We started using Lacy bred sires in the last 5 years and like the growth and fescue adaptability that those sires have brought. These heifers have been born and grazed on fescue and wintered on fescue hay. Currently they are grazing fescue pasture and will be supplemented with corn before the sale. All have passed a breeding soundness exam, been wormed with Synanthic, poured with Standguard, and vaccinated with Express FP and Ultrabac 5- VL on 8-16-20. Will sell in 4 groups of 3 - A, B, C, D.

8 COMMERCIAL OPEN HEIFERS

Offering 8 commercial heifers right out of our replacement group. These ladies have been grown on fescue pasture and about 2 lbs of grain a day since weaning just to keep them bucket broke. These females are either straight red angus or a few will have some Simmental influence on the dam’s side. Birth dates range from 9-2-19 to 10-24-19. The heifers have been synchronized using a 14-day CIDR protocol. If the buyer so chooses we will take these heifers home and AI them for an extra $100 over the sale price. They can be picked up the week of AI or we can turn out with our cleanup bull for 45 days for an extra $150. We are offering 10 straws of PIE ONE OF A KIND 842 RAAA #(4047190) with these 8 heifers! Will sell in 2 groups of 4 - A, B.
BIEBER ADELLE 184B - LOT 100 DONOR

BIEBER ADELLE 184B. We are selling a flush opportunity on an incredible donor cow with a proven performance track record! Check out the photos of this structurally perfect animal with one of the best udders we’ve ever seen. She won overall Grand Champion female at the Ozark Empire Fair in 2019, with her bull calf winning his Division. Likewise, they won medals at the MO State Fair and cleaned up on winning the medals at the Livingston County Fair. Perfectly gentle disposition and passes that trait to her offspring. Selling a flush opportunity with a guarantee of six viable embryos, and the buyer would keep up to nine embryos from the flush. The Seller would have the right to purchase 50% of the embryos from the flush after ten (10). Check out her son in this sale - BACH MR CRACKERJACK F111E ET.

BIEBER ADELLE 184B & BULL CALF - LOT 100 DONOR
Here's a top-notch embryo package that combines the awesome power of BROWN MS P707 Y7741 (FATTY PATTY) with 9 MILE ONE OF A KIND 6129. “Fatty Patty” is one of the best donor cows ever produced at RA Brown Ranch. Not only is she out of the great P707 bloodline, but her exceptional pedigree connection to the “Blue Moon” genetics places her in Top 3% Herdbuilder and Top 3% Gridmaster Index range. We had the opportunity to see the 9 MILE ONE OF A KIND 6129 (PIE ONE OF A KIND 352 son) bull in Denver a couple of years ago and purchased semen. We believe he will pass some excellent phenotype and genetics into his offspring. We are selling five (5) embryos (5 times the money) with a guarantee of two 60-day pregnancies if implanted by a certified embryo implant technician.

The potential for this mating is beyond exciting. Mann Red Box 55c is currently one of the most phenotypically correct and talked about Red Angus bulls in the breed. Duff Cattle Company offered 25 packages of 10 units of semen for Red Box and it demanded an average of $303/straw on 250 units. Red Box truly possesses a “Wow” factor as does Annie XT 3279A. They both possess many traits that are hard to find in one package including body volume, fleshing ability, soundness, foot structure, and style. The dam of Annie XT 3279A is Red Soo Line Annie 7249, one of the most decorated females in the red angus breed, including being named the World Angus Forum’s Reserve Grand Champion Female. Annie XT 3279A is very special and resembles her dam in many ways. Her elegant presence, three dimensional rib shape, frame size, and squareness of hip is truly unique. This mating is absolutely loaded with stellar genetics. An incredible opportunity, buy with confidence. Embryos will be held at ReproLogix in Kansas. 3 embryos with a guarantee of one pregnancy completed by a certified technician.
Here is your opportunity to inject some “World Class” genetics in your program. Both bulls are the result of brilliant breeding and possess a powerful look resulting from their dominant and proven ancestors. They are a combination of the best phenotype and genotype available in the industry today. If you are looking at producing offspring capable of winning championships in the show ring, or producing high quality powerful and functional cattle to work in the pasture, here’s a tremendous opportunity. Semen is located at Show-Me Genetics in Strafford, Missouri.

One of a Kind A228™ was the high selling bull in the 2015 Red Alliance Sale in Shawnee, Oklahoma. A son of BUF CRK The Right Kind U199 that is a smooth, easy-fleshing, free-moving, slickhaired, fescue-tolerant bull. While his sons are quite good, he produces incredibly functional daughters with super udders, extended spine structure and length of body and extremely good feet and leg composition. In the cattle business there is nothing more important than longevity and fertility in your cow herd, his dam—the $40,000 Badlands Cedar 922 cow is one of the most famous and productive females in the breed. At the age of 15 she had a natural calf and is a top donor cow averaging 12 eggs per flush. If you have moderate or medium framed cows, he will add that growth explosion with added length and stature with exceptional style and correctness. semen will be shipped from Show-Me Genetics, Strafford, MO at buyers expense.

While JSWO Stockman F101 is an outstanding individual to look at and analyze with great muscle expression, structural correctness and outstanding feet. We encourage you to look at his extended pedigree which contains some of the breeds leading proven bulls and females from Pieper, Bieber and Andras herds. Combine all that with a very impressive EPD profile and we think he will make a great impact on any herd. Here is a picture of him in his working clothes and a picture of his Andras Fusion x Bieber Tilly Dam. Selling 10 units semen Stored at the ranch. Buyer pays shipping cost or picks up at the ranch.”
Why “Missouri” Red Angus?

Many of us have experienced the problems that can be associated with importing newly purchased cattle into our “Fescue” environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue will struggle once imported into the fescue belt & forced to perform in our environment,.............."on the grass we love to hate". Fescue toxicity often referred to as “Summer Slump”. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth and reduced calving rates. Some animals eventually overcome this issue but many will not and will eventually be culled from the herd.

While there are several tools offered to combat the problems such as mineral supplements, DNA testing, etc., their success rate has limited at best. The USDA estimates Fescue toxicosis costs the U.S. beef industry an estimated $600 million to $1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

Research on the subject has been done for years & in 2016, University of Missouri Extension geneticist, Dr. Jared Decker won a $2 million grant from the USDA to find genetic differences among regions. Decker & his colleagues are utilizing DNA markers to study the interactions between cattle DNA & the environment. The study is focused on DNA, hair shedding & tall fescue forage. When complete, the data will used to design region-specific EPD’s.

The entire state of Missouri is situated within the fescue belt and since fescue was introduced into our region, Missourian’s have built their herds using genetics that have proven to be “fescue tolerant” livestock. This is one of the great advantages that the vast majority of our members have over breeders from outside the fescue belt..............”Bred In Fescue Tolerance”
Ritchey Ear Tags have been made in the good ole USA since 1964. Just like Old Glory, our tags have stood the test of time and have proven themselves faithful and true.

Ritchey’s dual-colored, engravable tags allow for permanent numbering.
